Ditto™

SECURING DATA
TODAY TO PROTECT
OUR TOMORROW

FEATURES	BENEFITS
Portable	The Ditto Forensic FieldStation is portable, yet powerful. It travels with you into the field to create disk clones and images. Ditto FieldStation also helps you log and maintain your chain of custody while using forensic (write-blocked) methods.
Suspect Inputs (write-blocked)	SATA, eSATA, PATA, USB 2.0, Ethernet (iSCSI, NFS). Additional interfaces via expansion modules.
Destination Outputs	Dual SATA, eSATA (single, dual and mirrored), Ethernet (iSCSI, NFS), SD Card
LCD Navigation	System operation via front panel LCD/soft-touch navigation
Web Browser Interface	System configuration, management, and operation via web browser interface. Supports remote preview and operation via network or VPN.
Multi-user Support	Web browser can be multi-user password protected, including assignment specific permission levels by user profile.
Drive Cleaning	Utility supports 9 erase modes including government approved preset modes and user configurable options
Stealth Mode	Turns off LCD display and LED indicators to prevent detection.
Rugged Design	Rugged, all aluminum design with no fans which makes the Ditto FieldStation quiet in all environments.

4.92" x 6.77" x 1.72"
(125mm x 172mm x 43.7mm)
Shipping Weight 5 lbs. (2.3kg)

PART NUMBER	DESCRIPTION
31700-2809-0000	Ditto Forensic FieldStation image clone or browse SATA, IDE, USB, ethernet devices, write to LAN or 2 SATA targets, US
31310-0000-0060	Field Kit D-0, Ditto Carrying Case, empty, Pelican 1450 case w/custom foam for Ditto + expansion modules
31310-2809-0061	Field Kit D-1, includes Ditto & accessories in a water resistant dust-proof Pelican 1450 carrying case w/custom foam, US

Ditto Forensic FieldStation

A must-have for digital forensic investigations, the Ditto Forensic FieldStation is a complete and portable toolkit for creating disk clones and images. Ditto FieldStation can be deployed by non-forensics experts and administered and operated remotely by forensics specialists since they are network-ready. Via VPN, the Ditto FieldStation can be configured, administered, and managed via an intuitive web browser interface.

Flexibility and speed via browser-based interface

An easy-to-use web browser interface supports remote operation via network or VPN, providing access to Ditto configuration, user administration and user rights, as well as direct operation of Ditto cloning and imaging. This time- and money-saving capability speeds time to data capture, as well as allows organizations to optimize staffing and deployment.

Stand Alone Use

Work with evidence drives directly from Ditto, with no host computer required, whether in the lab or in the field. The easy-to-use LCD menu makes it simple to view device information, start an image capture or clone a drive.

Easy Management

Separate user or agent profiles, with user-assignable access rights, can be created for Ditto.

Expansion Modules

Ditto can support extra expansion modules for additional connectivity, including USB 3.0, FireWire 800/400, and SAS.

Data Acquisition Modes

Clone, DD, E01 with MD5 and SHA-1 hashing. Combined mode that captures a clone and image in a single pass reading of the suspect drives.

Log Files

Log files are stored on a removable SD card for classified and intelligence applications, so no operational data needs to remain on the Ditto system. XML format allows users to parse data for reports.
