

## VOOM SCSI HARDCOPY

### Break the Speed Barrier Today

Your hard drive imaging needs are increasing, hard drive capacities are increasing, but your imaging equipment is not keeping pace. The VOOM SCSI HardCopy breaks the speed barrier at up to 9 GB per minute. Tired of waiting for your image to finish? Use the VOOM SCSI HardCopy and forensically duplicate more drives faster today!

### Easy to Use, Easy to Expand

VOOM SCSI HardCopy is incredibly easy to use. A simple 3 button interface and straightforward easy to understand display. Only SCSI HardCopy forensically images UltraSCSI Hard drives at the speed of the drive. SCSI HardCopy is this fast. No adapters required for imaging or cloning Ultra SCSI hard drives. Although no drives operate at 9 GB per minute yet, when they do, SCSI HardCopy will handle them!

### Power, Performance and Price in one Package

SCSI HardCopy combines the best performance available, advanced features, ease of use, very light weight, and low price for a state of the art offering that breaks the SCSI and HDD imaging speed barrier.

### Capabilities

- Image SCSI drives at up to 9 GB per minute
- Store entire images in single ISO (dd type files, also called flat files) file for ease of investigation
- Option to 'chunk' data into multiple files for ease of archiving. CRC on each chunk, and MD5 to ease forensic validation of the data

### Benefits

- Cut your imaging time in half
- Very light weight – less than two pounds, plus the laptop style power supply
- Manual is included, but it is so easy to use that most users never open the manual
- Based on the proven HardCopy II technology

## SPECIFICATIONS

### Standard Features

- **Proven HardCopy Engine**
  - Includes optimized drive imaging – imaging at same speeds as cloning.
  - Up to 9 GB per minute sustained data transfer rates – go at the speed of the drives!
- **Dynamic Capacity**
  - SCSI HardCopy will handle any size drive available
- **Modular**
  - New features will be made available to SCSI HardCopy as add-ons to prolong the life and increase the value of SCSI HardCopy

### Maintenance

- First year hardware and firmware maintenance included

### SCSI HardCopy Advanced Features

- Two SCSI Terminators
- Two SCSI Cables
- Carrying case
- One DB9 cable (for feature upgrades)

### The HARDCOPY II Advantage

- Speed. Nothing else is as fast as the SCSI HardCopy
- State of the art functionality with entry level pricing
- The industry's easiest to use interface means you can unpack and begin using SCSI HardCopy immediately

### About VOOM Technologies, Inc

VOOM delivers state of the art, universal, affordable storage solutions exclusively through business partners that provide government and companies of all sizes first class storage capabilities without huge system costs or complexities
