

INTERNET EVIDENCE FINDER

Our software recovers deleted and existing artifacts relating to chat conversations, web browsing history, social media and other common Internet activity.

Internet Evidence Finder® (IEF) Key Benefits:

- **Time Savings:** All-in-one automated tool that gets to evidence quickly with very little manual intervention
- **Increase Efficiency:** "Set it and forget it" while you work on other tasks and improve case turnaround times
- **Finds More Evidence:** Uncover deleted and existing evidence from 200+ Internet-related artifacts
- **Easy to Use:** Get to evidence quickly. Minimal learning curve with no extensive training required.

Powerful Search Capabilities:

Search 200+ Internet artifacts and recover more data from more locations:

- Recover data from social networking communications, instant messenger chats, cloud-based artifacts, P2P file sharing apps, mobile backups, webmail, web browser history, pictures and videos
- Proprietary carving technique recovers more data from unallocated space and live memory captures
- Search entire logical or physical drives
- Search files including the pagefile.sys, hiberfil.sys, sleep image, swap file and more
- Ability to search multiple drives, images, files and folders in a single search
- Native support for E01, Ex01, L01, Lx01 and dd images
- Native support for Windows and Mac filesystems
- Leave no digital footprints on target computer with "Stealth mode"*

Comprehensive Reporting: Standardized and straightforward reporting:

- Create standardized and consistent reports across your department
- Search, filter, and bookmark important evidence
- Search presets to locate credit card numbers, phone numbers and email addresses
- Easily export report in html, pdf, excel, csv, and tab-delimited formats
- Share "Portable Case Folder" with other investigators and stakeholders for them to review
- Powerful timeline feature provides a view of each artifact on a visual timeline

Adheres to Industry Standards: Maintain the integrity of the case and chain of custody:

- Integrity of file metadata is maintained - no data is altered
- IEF provides the full offset/physical location so the artifacts can also be found in other forensic tools
- Be confident in the results when testifying in court
- Evidence used in a number of high profile criminal cases

Find Evidence Quickly: Get immediate search results, so you can start working with the data right away:

- Use "Quick Search" to see what's there and focus the investigation
- Review results in real-time without having to wait for the entire search to complete
- Target search by artifact type, keyword and location on hard drive
- Refine search results by skin tone and body part detection

Trusted by Industry Leaders: Used by leading law enforcement, government, and businesses around the world:

- Developed by a former police officer and forensic examiner
- Validated by the DOD Cyber Crime Center (DC3)
- Validated by the National Institute of Justice (NIJ)
- Trusted by thousands of organizations in 90+ countries

Simple to Use: Get to key evidence with only 3 clicks of a mouse:

- Single search for 200+ Internet artifacts
- No need to run multiple scripts
- Start working on your case immediately
- No complicated setup
- 'Set it' and 'forget it' while you work on other things
- Minimal training required
- Built-in live RAM capture*

Built-in Intelligence: Get to the relevant evidence quickly with refined results:

- Rebuild web pages in their original format on the date they were visited
- Parsed search queries for user keyword searches on major search engines
- Web history categorization (i.e. dating, cloud, classifieds, chat, social media sites and more)
- Google Maps Tiles & Geo-Location Visualization
- Automatically checks for full disk encryption (TrueCrypt, BitLocker, SafeBoot)*

Internet Evidence Finder is used by:

With IEF there are only 3 easy steps and you are at the evidence.

1. Point it at the drive, file/folder or image.

2. Select which artifacts to search for.

3. Generate a standardized, easy-to-read report.

Corporate Security

“IEF is one of my personal favorite tools. It has a very unique capability to be able to mine a lot of browser-based artifacts from memory, unallocated space and other areas.”

Rob Lee, Forensics Curriculum Lead at SANS Institute

“I’ve purchased two forensic tools in the past 10 years, and IEF is one of them. IEF is an elegant solution combining ease of use with robust reporting and results.”

Andrew Rosen, President, ASR Data Acquisition & Analysis, Forensic Computer Scientist
