

OXYGEN FORENSIC® KIT

Your Forensic Solution for Field Usage

**OXYGEN
FORENSICS**

Designed for portability, Oxygen Forensic® Kit is a unique mobile solution that gives you the power of a lab solution out in the field! Oxygen Forensic® Kit with full cable set weighs only 3 pounds, allowing for easy transport to critical locations. The Kit can accompany you at the crime scene and is ready for instant mobile device acquisition.

OXYGEN FORENSIC® KIT COMPONENTS

- Getac F110 Tablet PC (i5 processor)
- Preinstalled Oxygen Forensic Extractor
- USB Dongle with Oxygen Forensic Detective for a lab PC
- Preinstalled Oxygen Drivers Pack
- Oxygen Cable Set
- Rugged Carrying Case

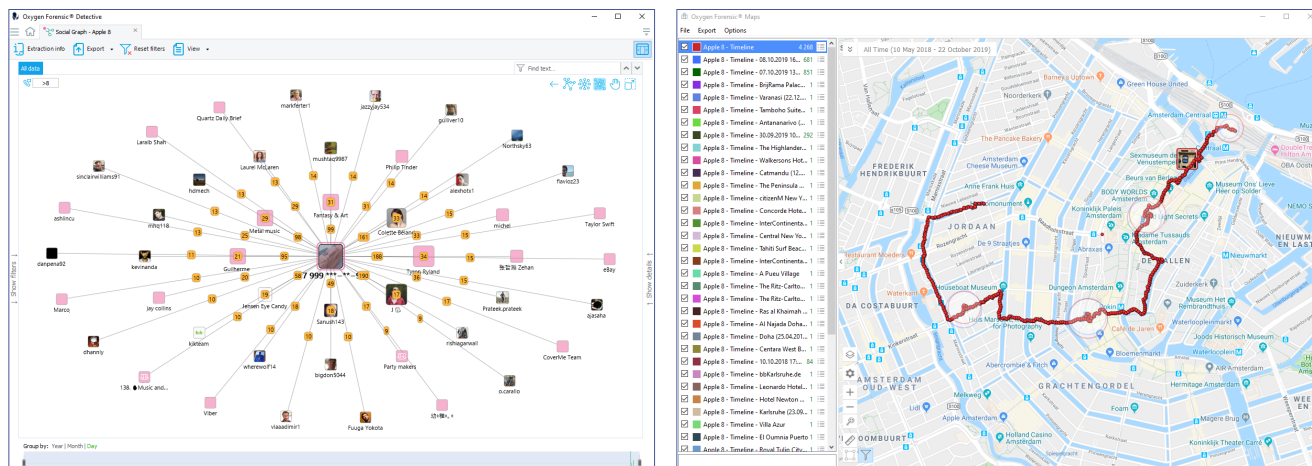

EXTRACTION IN THE FIELD

Oxygen Forensic® Kit is not only portable but also easy to use. No additional installation, settings or configuration are required. Power it on, choose a cable from the cable set, run Oxygen Forensic® Extractor, and connect a mobile device. The Extractor offers various methods to bypass or deactivate the device screen lock. It also allows to import device backups (i.e. iTunes backups) even encrypted ones. The Extractor acquires contacts, chats, calls, calendars, notes, file system, passwords, locations, apps, and deleted records from a vast variety of mobile devices. Once data acquisition is complete, you can create a data report or save an OFB backup that can be opened later in the lab using Oxygen Forensic® Detective.

ANALYSIS IN THE LAB

In addition to pre-installed Oxygen Forensic® Extractor we supply a USB dongle with our flagship product—Oxygen Forensic® Detective. With the help of Oxygen Forensic® Detective, you can perform a deep in-lab data analysis, using the benefits of Timeline, Social Graph, Aggregated Contacts, and many other sections. Moreover, data acquisition from cloud services, IoT devices, drones, PCs and smartwatches is also available.

OXYGEN FORENSIC® EXTRACTOR FEATURES AVAILABLE ON A TABLET PC	OXYGEN FORENSIC® DETECTIVE FEATURES AVAILABLE ON A USB DONGLE
<ul style="list-style-type: none"> ✓ Acquisition of devices, SIM and media cards ✓ Screen lock bypass and unlock methods ✓ Device backups and images import ✓ Best-in-class apps data decoding ✓ Keyword search during data extraction ✓ Data reports to popular file formats 	<ul style="list-style-type: none"> ✓ Mobile data extraction and recovery ✓ Access to cloud storages and services ✓ Drone data acquisition ✓ Thorough data parsing and recovery ✓ Built-in analytical tools ✓ Locations visualization on Offline Maps ✓ Data reports to all popular file formats
