VOOM Shadow™ 2

Computer Forensic Analysis Device

The Shadow is an innovative, fast, and powerful computer forensic hardware tool for the progressive and dedicated investigator.

**In use by U.S. and
Worldwide Justice
Agencies, Local Law
Enforcement, and
the Private Sector**

**Swift Performance
Solid Engineering
State-of-the-Art
Technology**

Break Convention – *VOOM IT! . . . and Do What No One Else Can.*

Preview Evidence

A unique capability that helps you to immediately determine the scope and magnitude of evidence without having to image and transfer data before viewing.

Easily operate suspect computer indefinitely.

Break the Speed Barrier – *VOOM IT! . . . and Save Time.*

View Evidence Just as the Suspect Does

Boot and run suspect computer right away using popular PC applications, suspect's custom designed software, and your own forensic software (e.g., password cracking tools, etc.).

Have confidence in your analysis without having to wait for forensic lab results.

Break Down The Suspect – *VOOM IT! . . . and Save Effort.*

Demonstrate the Implications of Evidence

Clearly show the suspect and legal advisor any portion of the evidence. The legal position will be understood quickly and an admission of guilt can then be vigorously encouraged.

Break Apart Legal Tactics – *VOOM IT! . . . and Win.*

Present Comprehensible Evidence at Trial

Don't let the evidence be obfuscated. With the Shadow, there is no need for extensive education of the layperson. Simply show the judge and jury exactly what the suspect would have viewed on the suspect's own computer – and leave no doubt in their minds!

VOOM IT! . . .and Do What You Do Best, Even Better.
